

Science Critics

An International Peer-Reviewed Journal

Author
Guidelines

SUBMISSION GUIDELINES

- **Science Critics** – An international peer-reviewed journal accepts **Research Articles, Review Articles, Short Communication and Scientific Findings**.
- The size of **research papers** is not constrained. In the greatest interest of the readers and the spread of the work, we do strongly advise authors to be as concise as possible (**Maximum 6000 words including abstract, references, tables and figures**).
- **Review papers** often concentrate on works that have been published during the last five years (**Maximum 13000 words including abstract, references, tables and figures**).
- **Short Communication** providing relevant and sufficient scientific information (**Maximum 2000 words, including references, tables and figures**).

STUDIES INVOLVING HUMANS & ANIMALS

The author should make sure that the work has been done in line with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for studies involving humans, if the study uses human subjects or human data. According to the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals, the article should follow their guidelines and strive to include representative human populations (sex, age, and ethnicity). Gender and sex should be used appropriately. The 'Ethical Statement' part of the manuscript must have a statement that includes the project identification code, the date of approval, and the name of the ethics committee or institutional review board.

All animal experiments must adhere to the ARRIVE guidelines and be conducted in accordance with the EU Directive 2010/63/EU for animal experiments, the National Research Council's Guide for the Care and Use of Laboratory Animals, or both. The authors must also explicitly state in the manuscript that these regulations have been followed. The sex of the animals must be noted, as well as any influence (or a association) that sex may have had on the study's findings.

Peer Review Policy

Science Critics – An international peer-reviewed journal uses a single anonymous peer review procedure. The Chief Editor will first determine if each submission is appropriate for the journal. Papers that are judged appropriate are subsequently sent to at least two independent, experienced reviewers who will evaluate the paper's scientific merit. The Chief Editor is in charge of making the final decision regarding acceptance or rejection of an article. Editors are not involved in choices on papers that they have authored, have had authored by relatives, friends, or coworkers, or that are about goods or services in which the editor has an interest. Such submissions must follow all standard journal policies, and peer review is carried out independently of the pertinent editor and their research teams.

Article Structure (Research)

- 1- Title Page (Including Title, Author details, Affiliations, Corresponding author details, Abstract and Keywords).
- 2- Introduction explaining the background of the study.
- 3- Materials & Methods
- 4- Results & Discussions
- 5- Conclusion
 - Acknowledgement
 - Declaration of Interest
 - Author's Contribution
 - Ethical Statement
 - Funding Statement (Write "Not Applicable" if no fundings was received)
 - References

Article Structure (Review)

- 1- Title Page (Including Title, Author details, Affiliations, Corresponding author details, Abstract and Keywords).
- 2- An introduction explaining the background of the study.

- 3- Headings
- 4- Conclusion
 - Acknowledgement
 - Declaration of Interest
 - Author's Contribution
 - Ethical Statement
 - Funding Statement (Write "Not Applicable" if no funding was received)
 - References

Points to Remember while preparing a manuscript

- Abstract should be not more than 200 words justifying the background, purpose and conclusion of the study (Not in the mentioned heading format).
- Not more than 6 keywords are allowed and should be separated by ; punctuation.
- Headings (1,2,3,4....), subheadings (1.1, 2.1, 3.1, 4.1....) and sub subheading (1.1.1, 2.1.1, 3.1.1, 4.1.1....) should be numbered consecutively.
- Font "Times New Roman" should be used throughout the manuscript and font size should be 12.
- Heading, subheading and sub subheading should be in bold, bold italics and italics respectively.
- Line Spacing should be 1.5 throughout the article.
- All the lines should be numbered continuously starting from the title (Continuous Line Numbering).
- Tables and Figures must be included in the manuscript where ever required, it should not be in a separate file or at the end of the manuscript.
- The articles must be original and free from any sort of plagiarism. The corresponding author and co-authors of the articles will be responsible for any plagiarism and misconduct.
- The manuscript should be uploaded or sent in the word document format only, pdf or another format will not be accepted.
- References and citations must be acknowledged appropriately. APA style of referencing must be followed.
- Manuscripts not found as per the guidelines or inside the scope will be rejected after the initial assessment (Chief Editor holds the right to accept or reject a manuscript).

Declaration of Competing Interest

Declare if there is any conflict among the authors. Use "There is no competing interest between the authors" statement if there is no conflict.

Author's Contribution

Contribution statement should include "AB drafted and wrote the original manuscript, CD Supervised the manuscript, EF, wrote and reviewed the manuscript, GH prepared the figures and tables".

Ethical Statement

Ethical statement should declare clearly that no animals and human were harmed during the study.

Funding Statement (Write "Not Applicable" if no funding was received)

Author should declare the funding details in this section.

References

All the citations in between the text should be supported by reference at the end of the manuscript and vice versa. Reference should be in APA style only; no other format will be accepted.
